

Contacting Plextor's Technical Support Department

YOUR TASK: Learn the variety of methods you can use to contact Plextor's Technical Support Department. Learn what information you should gather before contacting Plextor's Technical Support Department.

YOUR OBJECTIVE: Know how to get in contact with Plextor if you experience any problems installing or operating your 12PleX CD-ROM drive.

YOUR METHOD: Store Plextor's e-mail, Web site, phone, fax, and BBS numbers in a convenient location. Keep your drive's serial number and a copy of your sales receipt handy, as well.

If you experience a problem while installing or operating your 12PleX drive, please refer first to the troubleshooting chapter (Chapter 12) in this manual. It contains solutions to the most common types of problems fielded by our technical support staff.

Our Technical Support Department will help you solve problems that relate specifically to your 12PleX drive. In many cases, a problem that appears to be caused by your CD-ROM drive actually originates in another part of your computer. In such instances, our technical support staff will try to help you identify the part (e.g., SCSI interface board) at fault, and will refer you to the manufacturer of that part for further assistance.

Although we think highly of the capabilities of our technical support staff, we recognize that they do suffer from some limitations; namely, they do not possess psychic or telepathic powers. Therefore, their ability to help you depends a great deal on your ability to help them. You must act as their eyes and ears as they try to diagnose and fix your problem. If you gather the information requested on the following page before you contact them, you will find that your problem can be resolved much more quickly.

Plextor's Technical Support Department is available Monday through Friday, 6:30 a.m. to 5:30 p.m., PST. We are closed on weekends and some holidays.

How to Contact

There are three ways for you to contact Plextor's Technical Support Department:

- 1) Send us e-mail at **support@plextor.com.**, or visit our Web site for answers to frequently asked questions.
- 2) Log on to our BBS (2400/9600/14.4/28.8/MNP, V.42bis) at 408-986-1569. You will find a great deal of useful information and software on our BBS. It includes:
 - Device drivers for various SCSI interface boards and soundboards (available only to those who have purchased these boards directly from Plextor).
 - Utilities to enhance the operation of your drive.
 - Discussions of various technical problems you might encounter, with suggestions as to how you might fix or circumvent them.In addition, you can upload questions you have about the installation or operation of your 12PleX drive. A member of Plextor's technical support staff will respond to your question either by phone or modem.
- 3) Send a fax to the attention of the Technical Support Department at 408-986-1010. Include your telephone number and the hours during which you can be reached. Be as detailed as possible in describing your problem. It typically is useful if you also send a printout of your AUTOEXEC.BAT and CONFIG.SYS files.
- 4) Call 800-886-3935 and select the technical support extension.

Before You Call/FAX/Log On

Please gather as much of this information as possible:

- ✓ The serial number of your CD-ROM drive (your serial number can be found both on the warranty card that accompanied the drive and on a label on the drive itself).
- ✓ The name and model number of your SCSI interface board (e.g., Future Domain TMC-1610, Adaptec AHA-1515, Trantor T-130).
- ✓ The version of the software device drivers that came with your SCSI interface board (this typically is found on the label of the floppy disk which contains the device drivers).
- ✓ The version of the Windows, DOS, Mac, Novell, OS/2 or UNIX operating system you are using.
- ✓ The brand name and model number of your computer (e.g., Dell 466/NP, Micron P66PCI Powerstation, ALR Evolution V, Apple Macintosh Performa 575).

- ✓ The type of VGA, Super VGA, or other graphics card you use.
- ✓ Brand name and model number of any other peripherals you have installed/connected to your computer (e.g., scanner, fax board, network board).

Returns

You must receive an RMA (Returned Materials Authorization) number from the Technical Support Department before any Plextor CD-ROM drive can be returned for repair or replacement. Any drive sent to Plextor without an RMA number will not be accepted. Drives must be sent postage prepaid. We recommend that you insure your shipment, as Plextor cannot be held responsible for any damage that may occur during shipment.

ABOUT PLEXTOR

Plextor is a subsidiary of the Shinano Kenshi Company (SKC), Ltd. SKC's roots stretch back to 1918, when it began to manufacture textiles in Japan's northern prefecture of Nagano. (Nagano, incidentally, will be the site of the 1998 Winter Olympics.) SKC's involvement in the electronics industry started in 1962, when it diversified into the production of stepper motors for commercial audio products. SKC is now one of the world's largest manufacturers of small motors used in hard disks, floppy disks, tape drives, copy machines, video cameras—and your Plextor CD-ROM drive.

Over the past decade, SKC has developed a reputation as an innovator in compact disc and CD-ROM technology. In 1992 it was the second company to begin shipments of double speed CD-ROM drives. In 1994, it was the first company to begin shipments of half-height quad speed CD-ROM drives. In early 1995, SKC was the first company to ship a six speed CD-ROM drive. In early 1996, they shipped the first professional quality eight speed CD-ROM drive. SKC also is a leading manufacturer of compact disc players used for industrial and commercial applications (e.g., background music players for retail stores, restaurants, and shopping centers).

Plextor acts as SKC's sales, service, and support arm throughout the world. In addition to CD-ROM drives, Plextor also sells under its own label professional audio equipment used by radio stations, high-speed printing presses, and a CD encoding system developed by SKC that can pack up to eight hours of audio onto a single compact disc.

Plextor's home office is in Tokyo. Plextor first opened an office in California's Silicon Valley in 1990. Rapid growth has required it to move twice since then to larger offices. Plextor now occupies a 30,000 sq. ft. facility in Santa Clara, California, which is staffed by sales, marketing, technical support, engineering, administrative, and shipping personnel. Our European office (in Brussels) began operation in 1994.

Plextor's CD-ROM Drives					
	MODEL	INTRODUCED	DATA TRANSFER RATE	ACCESS TIME	BUFFER SIZE
1st generation	DM-3020/5020	1990	150KB/sec	430ms	64KB

10th generation	PX-12CS/12TS	1996	1800KB/sec	105ms	512KB

Warranty Information

PLEXTOR CORP. ("PLEXTOR") warrants your 12PleX CD-ROM drive against any defect in material and workmanship, under normal use, for a period of two years following its date of purchase. In the event this product is found to be defective within the warranty period, PLEXTOR will, at its option, repair or replace the defective CD-ROM drive.

This warranty is void if: a) the drive is operated or stored under abnormal use and maintenance conditions; b) if the drive is repaired, modified, or altered, unless such repair, modification, or alteration is expressly authorized in writing by PLEXTOR; c) if the drive is subject to abuse, neglect, lightning strike, electrical fault, improper packaging, or accident; d) if the drive is installed improperly; or e) if the serial number of the drive is defaced or missing.

PLEXTOR will not, under any circumstances, be liable for direct, special, or consequential damages such as, but not limited to, damage or loss of property or equipment, loss of profits or revenues, cost of replacement goods, or expense or inconvenience caused by service interruptions. Under no circumstances will any person be entitled to any sum greater than the purchase price paid for the drive.

To obtain warranty service you may contact PLEXTOR's Technical Support Department by calling 800-886-3935. They will attempt to diagnose and correct your problem by phone. If the drive does not function properly they will issue a Return Material Authorization (RMA) number. You may be asked to furnish proof of purchase to confirm that the drive is still under warranty.

All 12PleX CD-ROM drives returned to PLEXTOR must be securely packaged and shipped postage prepaid. All product returns must be authorized in advance by PLEXTOR's Technical Support Department. Authorization is confirmed by issuance of the RMA number, which must be written prominently on the outside of the box in which the defective drive is returned to PLEXTOR.
